

Rough Carpentry

1. *Fire retardant lumber, when allowed by code and approved by the AHJ, will be in accordance with American Wood Preservers Association standards.*
2. *Where any wood based materials are in contact with the ground or other moisture sources, a material suitable for such application shall be considered. PM approval is required.*
3. *Wood frame buildings and renovations (combustible construction) do not meet current University Standards and must have prior AHJ and Risk Management approval.*

Refer to Division 9 for Architectural Millwork and Cabinetry information.
